Year group	3
Teacher	Mrs Booth
Date	Monday 25th January 2021

Hello again Y3, I hope you had a relaxing and fun weekend. Once again, I will be available to chat with you on Microsoft Teams today. I hope we're all used to our new routines now and we're all coping well. Things are different at the moment but we can all still stick together and look after each other. Mrs Booth x

Numeracy: Today we start a new block of work all about measuring length. When we want to know how long something is we can use a tape measure or a ruler. Shorter things we would measure using centimetres (cm) or millimetres (mm). Find a ruler and look at the cm and mm on it. Notice how small mm are, there are 10mm in each cm! Sometimes we might use a mix of cm and mm to measure, so something might be 2cm and 1mm, knowing there are 10mm in each cm, I know that that is 21mm altogether. Look at Lesson 11 today. It's a good idea to find a ruler and measure some small items in cm and mm till you are confident.

Literacy: Sssshhhhhh! Today we are starting a block of spelling, we are starting with silent letters. Can you be silent while you watch the video below?

[video - silent letters](#)

Have you written all your silent letter spellings correctly? Double check, maybe ask someone at home to help you check them. Once you are sure they are correct you can use look say cover write check to practise them ready for tomorrow's lesson, which includes a spelling test!

Science: Our last day of work about rocks today Year 3. Today you will discover that the different types of rock you have looked at this week are all connected, and there's a fun demonstration of how which uses jelly beans!

[video - the rock cycle](#)

There is a quiz at the end of the video to test your learning so have a pencil and paper ready to take notes while the video is on and to write down your answers in the quiz!

Challenge:

Can you write your 8 times table? Do you know it off by heart or do you have to use your fingers to remember some of the facts? Practise writing and saying your 8 times table until you feel confident you know all the facts quickly without having to think too much!
